Toxicology 166 (2001) 173–175

TOXICOLOGY

Subject index of volume 166

A549 cells; Fe_2O_3; Benzo(a)pyrene; Pyrene; Oxidative stress **166**, 129

Acetaldehyde; Aldoxane; Crotonaldehyde; DNA adducts; Paraldol **166**, 31

Aldoxane; Acetaldehyde; Crotonaldehyde; DNA adducts; Paraldol **166**, 31

Allergen; Mast cells; Human allergy test model; Histamine; IgE antibody **166**, 91

Alveolar macrophages; Amiodarone; Desethylamiodarone; Vitamin E; Alveolar type II cells; Clara cells; Lipid peroxidation; Isoprostanes **166**, 109

Alveolar type II cells; Amiodarone; Desethylamiodarone; Vitamin E; Alveolar macrophages; Clara cells; Lipid peroxidation; Isoprostanes **166**, 109

Amiodarone; Desethylamiodarone; Vitamin E; Alveolar macrophages; Alveolar type II cells; Clara cells; Lipid peroxidation; Isoprostanes **166**, 109

Anti-mutagenic compounds; Corn; Characterization; *Salmonella* TA 100 and TA 98; Spectrometry; Linoleic acid **166**, 161

Antioxidants; Food-guide pyramid; Fruits and vegetables; Tea; Radical-scavenging capacity; 2,2-diphenyl-1-picrylhydrazyl; Epigallocatechin gallate **166**, 63

ATP hydrolysis; Chemosensitivity; Chemo*Select*®; Lactic acid **166**, 97

Benzo(a)pyrene; A549 cells; Fe_2O_3; Pyrene; Oxidative stress **166**, 129

Bioassay; Endocrine disrupter; Water; In vitro assay; Xenoestrogen; Phytoestrogen **166**, 79

Biotransformation; Organophosphorus compounds; Cytochrome P450; Flavin-containing monooxygenases; Phosphoric triester hydrolases; Carboxylesterases; Glutathione; Detoxication **166**, 139

Cancer risk; Carcinogen classification; Chemical carcinogens; Dichloromethane; Chloroform; Sulfuric acid; Ethanol **166**, 11

Cancer; Scientific community; Carcinogenesis; Chemopreventive **166**, 37

Carboxylesterases; Organophosphorus compounds; Cytochrome P450; Flavin-containing monooxygenases; Phosphoric triester hydrolases; Glutathione; Biotransformation; Detoxication **166**, 139

Carcinogen classification; Chemical carcinogens; Cancer risk; Dichloromethane; Chloroform; Sulfuric acid; Ethanol **166**, 11

Carcinogen; Epigenetic; Genotoxic **166**, 3

Carcinogenesis; Scientific community; Chemopreventive; Cancer **166**, 37

Cell transformation; Heterocyclic amines; Food **166**, 25

Characterization; Anti-mutagenic compounds; Corn; *Salmonella* TA 100 and TA 98; Spectrometry; Linoleic acid **166**, 161

Chemical carcinogens; Carcinogen classification; Cancer risk; Dichloromethane; Chloroform; Sulfuric acid; Ethanol **166**, 11

Chemoprevention; Irsogladine maleate; Stomach carcinogenesis; *N*-Methyl-*N*-nitro-*N*-nitrosoguanidine; Rat **166**, 53

Chemopreventive; Scientific community; Carcinogenesis; Cancer **166**, 37

Chemo*Select*®; Chemosensitivity; ATP hydrolysis; Lactic acid **166**, 97

Chemosensitivity; Chemo*Select*®; ATP hydrolysis; Lactic acid **166**, 97

Chloroform; Carcinogen classification; Chemical carcinogens; Cancer risk; Dichloromethane; Sulfuric acid; Ethanol **166**, 11

PII: S0300-483X(01)00490-5

Clara cells; Amiodarone; Desethylamiodarone; Vitamin E; Alveolar macrophages; Alveolar type II cells; Lipid peroxidation; Isoprostanes **166**, 109

Corn; Anti-mutagenic compounds; Characterization; *Salmonella* TA 100 and TA 98; Spectrometry; Linoleic acid **166**, 161

Crotonaldehyde; Acetaldehyde; Aldoxane; DNA adducts; Paraldol **166**, 31

Cytochrome P450; Organophosphorus compounds; Flavin-containing monooxygenases; Phosphoric triester hydrolases; Carboxylesterases; Glutathione; Biotransformation; Detoxication **166**, 139

Desethylamiodarone; Amiodarone; Vitamin E; Alveolar macrophages; Alveolar type II cells; Clara cells; Lipid peroxidation; Isoprostanes **166**, 109

Detoxication; Organophosphorus compounds; Cytochrome P450; Flavin-containing monooxygenases; Phosphoric triester hydrolases; Carboxylesterases; Glutathione; Biotransformation **166**, 139

Dichloromethane; Carcinogen classification; Chemical carcinogens; Cancer risk; Chloroform; Sulfuric acid; Ethanol **166**, 11

Diesel exhaust; Glycosaminoglycans; Oxidative stress; Reactive oxygen species; 8-hydroxydeoxyguanosine; Proliferating cell nuclear antigen **166**, 119

Dioxin-like potential; Genotoxicity; Endocrine disruption; Surface water **166**, 71

2,2-diphenyl-1-picrylhydrazyl; Food-guide pyramid; Fruits and vegetables; Tea; Antioxidants; Radical-scavenging capacity; Epigallocatechin gallate **166**, 63

Disease prevention; Tobacco addiction; Pharmacological interventions **166**, 47

DNA adducts; Acetaldehyde; Aldoxane; Crotonaldehyde; Paraldol **166**, 31

Endocrine disrupter; Water; Bioassay; In vitro assay; Xenoestrogen; Phytoestrogen **166**, 79

Endocrine disruption; Genotoxicity; Dioxin-like potential; Surface water **166**, 71

Epigallocatechin gallate; Food-guide pyramid; Fruits and vegetables; Tea; Antioxidants; Radical-scavenging capacity; 2,2-diphenyl-1-picrylhydrazyl **166**, 63

Epigenetic; Carcinogen; Genotoxic **166**, 3

Ethanol; Carcinogen classification; Chemical carcinogens; Cancer risk; Dichloromethane; Chloroform; Sulfuric acid **166**, 11

Fe_2O_3; A549 cells; Benzo(a)pyrene; Pyrene; Oxidative stress **166**, 129

Flavin-containing monooxygenases; Organophosphorus compounds; Cytochrome P450; Phosphoric triester hydrolases; Carboxylesterases; Glutathione; Biotransformation; Detoxication **166**, 139

Food-guide pyramid; Fruits and vegetables; Tea; Antioxidants; Radical-scavenging capacity; 2,2-diphenyl-1-picrylhydrazyl; Epigallocatechin gallate **166**, 63

Food; Heterocyclic amines; Cell transformation **166**, 25

Fruits and vegetables; Food-guide pyramid; Tea; Antioxidants; Radical-scavenging capacity; 2,2-diphenyl-1-picrylhydrazyl; Epigallocatechin gallate **166**, 63

Genotoxic; Carcinogen; Epigenetic **166**, 3

Genotoxicity; Endocrine disruption; Dioxin-like potential; Surface water **166**, 71

Glutathione; Organophosphorus compounds; Cytochrome P450; Flavin-containing monooxygenases; Phosphoric triester hydrolases; Carboxylesterases; Biotransformation; Detoxication **166**, 139

Glycosaminoglycans; Diesel exhaust; Oxidative stress; Reactive oxygen species; 8-hydroxydeoxyguanosine; Proliferating cell nuclear antigen **166**, 119

Heterocyclic amines; Food; Cell transformation **166**, 25

Histamine; Mast cells; Human allergy test model; Allergen; IgE antibody **166**, 91

Human allergy test model; Mast cells; Histamine; Allergen; IgE antibody **166**, 91

8-hydroxydeoxyguanosine; Diesel exhaust; Glycosaminoglycans; Oxidative stress; Reactive oxygen species; Proliferating cell nuclear antigen **166**, 119

IgE antibody; Mast cells; Human allergy test model; Histamine; Allergen **166**, 91

In vitro assay; Endocrine disrupter; Water; Bioassay; Xenoestrogen; Phytoestrogen **166**, 79

Irsogladine maleate; Stomach carcinogenesis; Chemoprevention; *N*-Methyl-*N*-nitro-*N*-nitrosoguanidine; Rat **166**, 53

Isoprostanes; Amiodarone; Desethylamiodarone; Vitamin E; Alveolar macrophages; Alveolar type II cells; Clara cells; Lipid peroxidation **166**, 109

Lactic acid; Chemosensitivity; Chemo*Select*®; ATP hydrolysis **166**, 97

Linoleic acid; Anti-mutagenic compounds; Corn; Characterization; *Salmonella* TA 100 and TA 98; Spectrometry **166**, 161

Lipid peroxidation; Amiodarone; Desethylamiodarone; Vitamin E; Alveolar macrophages; Alveolar type II cells; Clara cells; Isoprostanes **166**, 109

Mast cells; Human allergy test model; Histamine; Allergen; IgE antibody **166**, 91

***N*-Methyl-*N*-nitro-*N*-nitrosoguanidine**; Irsogladine maleate; Stomach carcinogenesis; Chemoprevention; Rat **166**, 53

Organophosphorus compounds; Cytochrome P450; Flavin-containing monooxygenases; Phosphoric triester hydrolases; Carboxylesterases; Glutathione; Biotransformation; Detoxication **166**, 139

Oxidative stress; A549 cells; Fe_2O_3; Benzo(a)pyrene; Pyrene **166**, 129

Oxidative stress; Diesel exhaust; Glycosaminoglycans; Reactive oxygen species; 8-hydroxydeoxyguanosine; Proliferating cell nuclear antigen **166**, 119

Paraldol; Acetaldehyde; Aldoxane; Crotonaldehyde; DNA adducts **166**, 31

Pharmacological interventions; Tobacco addiction; Disease prevention **166**, 47

Phosphoric triester hydrolases; Organophosphorus compounds; Cytochrome P450; Flavin-containing monooxygenases; Carboxylesterases; Glutathione; Biotransformation; Detoxication **166**, 139

Phytoestrogen; Endocrine disrupter; Water; Bioassay; In vitro assay; Xenoestrogen **166**, 79

Proliferating cell nuclear antigen; Diesel exhaust; Glycosaminoglycans; Oxidative stress; Reactive oxygen species; 8-hydroxydeoxyguanosine **166**, 119

Pyrene; A549 cells; Fe_2O_3; Benzo(a)pyrene; Oxidative stress **166**, 129

Radical-scavenging capacity; Food-guide pyramid; Fruits and vegetables; Tea; Antioxidants; 2,2-diphenyl-1-picrylhydrazyl; Epigallocatechin gallate **166**, 63

Rat; Irsogladine maleate; Stomach carcinogenesis; Chemoprevention; *N*-Methyl-*N*-nitro-*N*-nitrosoguanidine **166**, 53

Reactive oxygen species; Diesel exhaust; Glycosaminoglycans; Oxidative stress; 8-hydroxydeoxyguanosine; Proliferating cell nuclear antigen **166**, 119

***Salmonella* TA 100 and TA 98**; Anti-mutagenic compounds; Corn; Characterization; Spectrometry; Linoleic acid **166**, 161

Scientific community; Carcinogenesis; Chemopreventive; Cancer **166**, 37

Spectrometry; Anti-mutagenic compounds; Corn; Characterization; *Salmonella* TA 100 and TA 98; Linoleic acid **166**, 161

Stomach carcinogenesis; Irsogladine maleate; Chemoprevention; *N*-Methyl-*N*-nitro-*N*-nitrosoguanidine; Rat **166**, 53

Sulfuric acid; Carcinogen classification; Chemical carcinogens; Cancer risk; Dichloromethane; Chloroform; Ethanol **166**, 11

Surface water; Genotoxicity; Endocrine disruption; Dioxin-like potential **166**, 71

Tea; Food-guide pyramid; Fruits and vegetables; Antioxidants; Radical-scavenging capacity; 2,2-diphenyl-1-picrylhydrazyl; Epigallocatechin gallate **166**, 63

Tobacco addiction; Disease prevention; Pharmacological interventions **166**, 47

Vitamin E; Amiodarone; Desethylamiodarone; Alveolar macrophages; Alveolar type II cells; Clara cells; Lipid peroxidation; Isoprostanes **166**, 109

Water; Endocrine disrupter; Bioassay; In vitro assay; Xenoestrogen; Phytoestrogen **166**, 79

Xenoestrogen; Endocrine disrupter; Water; Bioassay; In vitro assay; Phytoestrogen **166**, 79
